IMPROVING THE STUDENTS’ ACHIEVEMENT ON WRITING DESCRIPTIVE TEXT BY USING REALIA

*Ika Afridah
*Siti Aisyah Ginting

Abstract

Students’ achievement in writing descriptive text is very low, in this study Realia was applied to solve the problem. Action research in conducted for the result and the technique to collect the data, qualitative and quantitative are applied in this research. The subject of this research is grade VII in Junior High School (SMP N 2 ) Kisaran. In the first evaluation (66, 2926) increased to the mean of second evaluation (76, 7560) and the mean of third evaluation (87, 0243). Observation result showed that the students gave their good attitudes and responses during teaching and learning process by applying the application of Realia. Questionnaire and interview report showed that students agree that the application of Realia had helped them in writing descriptive text. It can be conclude that the students’ achievement is improved when they are tought through Realia.

Key Words: Achievement, Writing, Descriptive Text and Realia

* A graduate of English Language and Literature Department of UNIMED

** A lecturer of English Language and Literature Department of UNIMED
INTRODUCTION

The Background of The Study

Based on the b In learning the English language, there are four skills should be taught to students. They are speaking, listening, reading and writing. In practice, learning the lessons taught writing after speaking, listening and reading. But this does not state that learning writing is not important. In fact, since writing is a very important lesson learning why writing is taught after the third important element is taught and writing also is the very difficult subject for the students. It is related to Oshima and Hogue (1999:3) that writing, particularly academic writing is not easy. It takes study and practice to develop this skill. For both native speaker and new learners of English, it is important to note that writing is a process, not a “product”. This means that a piece of writing, whether it is a composition for your English class or a lab report for your chemistry class is never complete; that is, it is always possible to review and revise, and review and revise again.

Writing is a very important capability for being owned by students, writing is also an excellent communication tool. Through writing, each person will be able to convey feelings, ideas, and announcements to others. Sharples (1999:8) actually, writing is an opportunity; it allows students to express something about themselves, explore and explain ideas. Student can convey their ideas in their mind by organizing them into a good text so that the others know them and they can think critically. Therefore, learning is very important for improved writing in particular learning of English in Indonesia because the writing is a process of transformation of thoughts and ideas into tangible forms of writing. In addition,
many people choose writing as a means of effective and efficient communication of information to be conveyed in some ways like posting letters, business letters and important information in a company's product.

In the *Kurikulum Tingkat Satuan Pendidikan* (KTSP) 2006 syllabus of junior and senior high schools curriculum require students to be able to write some kind of genre in writing. They are narrative, recount, descriptive, report, explanation, analytical exposition, hortatory exposition, procedure, discussion, reviews, anecdote, spoof, and news items.

Based on the above, the descriptive text is one genre that must be mastered by students in learning English. And theoretically, according to Ervina Evawina S (2010:7) descriptive paragraph is a paragraph vividly portrays a person, place, or thing in such a way that the reader can visualize the topic and enter into the writer’s experience.

In fact, not all students are able to write descriptive paragraph properly and in accordance with the existing elements in the descriptive text. Based on the researcher’s observation at the time of the teaching practice program (PPL) contained 75% of students who were unable to write a descriptive paragraph. Teachers of English already taught the material to students well but the students still had the problem in writing descriptive paragraph. In addition, the researcher also had looked the teachers of English language teaching by lecture, and then asked the students to write descriptive paragraph individually and there is no media.
From the above, student's ability to write descriptive text was very less because the learning methods that has been adopted by teachers of English language has been a method that does not fit anymore in this day because it reduced the interest and liveliness of the students in the learning process so that students were bored and did not want to continue learning as they should.

Because of that it is needed to improve the student ability in writing descriptive text by using media and the media that is used in this study is Realia. Realia can increase the students’ ability in writing descriptive text and will be interested in learning English because using realia that is making a connection between objects and language.

By using Realia will be expected to enhance students' skills in writing descriptive text properly and in accordance with the existing elements in the descriptive paragraph.

**The Problem of The Study**

Based on the background of the study, the problem of this study was formulated as follows:

“How do apply realia to improve the students’ achievement in writing descriptive Text?”

**The Scope of The Study**

There are many genres of writing learnt in the SMP (Junior High School) such as recount, narrative, procedure, descriptive, and etcetera. Specifically this study focused on improving on the students’ achievement in writing descriptive text. The media that will be used to improve students’ achievement on writing descriptive text is Realia. In other words, the study will be concentrated on the genre of descriptive.
The Objective of The Study

In relation to the problem, the objective of the study is to investigate and to find out the improvement of students achievement in writing descriptive text by using realia.

The Significant of The Study

Finding of this study will be expected to be relevant and useful in that finding are expected

1) to motivate the students to be better on writing descriptive text,
2) to provide significant information for the English teacher in their attempt to decide the Realia in teaching descriptive writing in senior high school,
3) to increase the readers knowledge about Realia and descriptive paragraph and,
4) to help the next researcher candidate of the teacher to apply a media in teaching learning process.

THEORETICAL FRAMEWORK

Achievement

Travers (1970:447) states that achievement was the result of what an individual has learned from some education experience. Additionally, Yelon, Weinstein, and Weener (1977:301) express achievement as the successfulness of individual, while another source Smith and Hudgins (1964:95) says that achievement was to do one’s best, to be successful to accomplish tasks requiring skill and effort and to be recognized by authority.

Based on the opinions above, it can be concluded that achievement was the result, the successfulness, the extent or ability, the progress in learning education experiences that the individual indicates relation with his/her educational learning. Achievement concerns with what someone has actually
learnt whereas aptitude was the potential for learning something. In other words, achievement was a success in reaching particular goal/status or standard, especially by effort, skill, courage, and so on.

**Writing**

Writing was a process of formulating and organizing ideas in right words to deliver the aim and present them on a piece of paper. According to Jones in R. Cooper and Odell (1977:33) writing was synonymous with discourse, and discourse was discussed in terms of its aims, it relate to the function of language, and in terms of its feature, which are the separate elements, devices, and mechanism of language.

On the other hand, Reinking, Hard and Osten (1993:188) state that writing was a way of communication and of course communicates all the time. And then Deporter and Heracki (2002:179) explain that writing was a whole brain activity, which use bright brain side (emotion) and left brain side (logic). Although right and left brain sides are used in writing, right brain side has a big position because it was a place which appears new ideas and emotion.

From the explanation above, we can state that writing was a whole brain activity to formulate and organize ideas in right words to deliver and communicate the aims to the reader and present it on a piece of paper.

**Descriptive Text**

A descriptive text was a piece of writing that was intended to convey meaning to the reader through sensory details and provides image to the reader. Additionally, descriptive text was a paragraph may be defined as a group of sentences that are closely related in thought and which serve one comment purpose often used to describe what a person looks like and acts like, what a place looks like, and what an object looks like. Furthermore, Pardiyono (2007:34) state that description paragraph was a type of written text paragraph, in which has the specific function to describe about an object (living or non-living things) and it has the aim that was giving description of the object to the reader clearly.
From the definition above, it can be concluded that description paragraph was a paragraph that describes a particular person, place or event in great detail. Description writing vividly portrays a person, place, or things in such a way that the reader can visualize the topic and enter into the writer’s experience. It was a way to enrich others forms of writing or as a dominant strategy for developing a picture of what something looks like.

Furthermore, Jolly (1984:470) assert there are five types of descriptive writing paragraph. They are:

a. Describing Process
   Describing a process not only explains how something was done, but also explains why it was done and what was needed to complete the process.

b. Describing an event
   To describe an event, a writer should be able to memorize and remember what happened in the event. Supposed the writer will write about Tsunami that was happened in Japan. In this case, he / she has to explain all details related to the event, so that the readers can imagine the real situation and condition.

c. Describing a personality
   In describing a person, the first thing that we do was recognizing his/her individual characteristics. We need to describe people occurs fairly areas of physical attribute (hair, eyes), emotional (warm, nervous), moral attributes (greedy, honest, worthy, trust), and intellectual (cleverness, perception)

d. Describing a place
   Presenting something concrete was the way to describe place, for example: a home, a hospital, and school.

e. Describing an object
   To describe an object accurately was done by providing the physical characteristics of the object such as the color, form, shape, and so on.
Part of Descriptive Text

There are three part of descriptive text. They are: 1. Social function, which was to describe a particular person, places, or things. 2. Generic Structure, which was divided in to two. They are: a) identification: identifies the phenomenon to be described, and b) description: describe parts, qualities, characteristics. 3. Significant lexico-grammatical feature, that was focus on specific participant, use simple present tense. (http://teachersonline.blogspot.com). Other source, Pardiyono (2007:34) maintain that three parts of descriptive, they are (1) communicative purpose, that was to describe an object (human and non-human). (2) rhetorical structure, there are two parts of rhetorical structure a) identification, that was statement that consist of one topic to describe; b) description, that was consist of the detail description about object that identify in identification, and (3) grammatical patterns, it was needed to understand that in descriptive paragraph, declarative sentence was used and using present forms.

From the two explanations above, we can conclude that the part of descriptive paragraph was divided in to three parts, they are:

a. Social Function
   Describe the characteristics and conditions of the object either person, thing, place, or animal) by using adjective and attribute.

b. Generic structure
   It was divided into two part they are a) identification was to identify the phenomenon that was described, and b) description was to describe the qualities, characteristics, condition, and part of an object in detail.

c. Grammatical feature
   In description paragraph, it uses present tense as normally.

Realia

According to Adrianne and Jordan (2000:23) the word ‘Realia’ sounds vaguely Latin. Realia means using real items found in everyday life as media to teaching English. Using realia helps students to make English lessons memorable by
creating a link between the objects and the word or phrase they represent. Realia breathes life into new vocabulary, the chances of the students remembering the new words have taught those increases, and automatically can write or share about the object or to provide experience on which to build and to provide students with opportunities to use all the senses in learning. E.g. take the word biscuit: the probability of remembering it becomes much higher after experiencing the taste, touch and smell of the object. Realia does not have to be limited to food or drink. Timetables, tickets, newspapers, clothes or in fact any object can think of can be used as a teaching media.

While using realia in the classroom is not always possible, it is usually the best choice if the students are learning all they can do about topic. If the real thing is not available, the teacher must move down the continuum from the concrete (real thing) to replica such as a model, to a semi concrete object such as a photograph or illustration. However, each move down the continuum causes the loss of some sensory information that could be helpful in comprehension.

The steps of implementing realia

1) Identifying Opportunities to Use Realia

Be aware of opportunities to include realia in lessons as you plan reread any stories to be read aloud or used for reading instruction to identity vocabulary that may be unfamiliar to the students and locate realia that will be helpful to their understanding. The students try to find the words are difficult before writing in front of the class based on the object. For example, they have note of the difficult vocabulary and to find the meaning of the words to make easier in writing.
2) Collecting Data

Begin to collect items that can be stored in the classroom and organize them so that they can be easily accessed for instruction. The students try to find the objects which are used in writing in front of the class. They must know what type of the object or how much it is. They know all of things about the objects.

3) Building a Library of Realia

After knowing all of things about the objects, the students have many vocabularies. For example is fruit. They know what are the English of warna (color), bentuk (model), batang (stem), and daun (leaf). They do not know before, but after learning using realia they like building a library of realia by themselves.

4) Using Fields Trips as Realia

If it is too large to move and the students’ learning would benefit by experiencing it, take a field trip. Give students the opportunity to really understand what they are studying. The students will be spirit to write after look at the object directly. But for note here, if it is the object impossible brought into the class like building of school, Borobudur temple, etc. the writer wants to emphasize that the writer does not use this step in implementing realia in teaching learning process. The writer is focus in the classroom only.

**METHODOLOGY**

This research was conducted as an action research procedure since involved a substantive act with a research procedure to find the improvement. Stringer (2007:1) maintains that action research was systematic approach to
investigation that enables people to find effective solutions to problems they confront in their everyday life. Action research focused on specific situations and localized solutions. Action research provided the means by which people in schools, business and community organizations; teachers; and health and human services may increase the effectiveness of the work in which they are engaged.

In this research, the data was collected by quantitative and qualitative approach. Quantitative data was collected by administrating composition text and qualitative was one research method that was describing the situation and the event (Sugyono, 2004:4).

Quantitative data was collected through evaluation sheet which administrated by the researcher. For gathering the qualitative data, the researcher used observation sheet, interview sheet and questionnaire. Observation sheet was used to identify all the condition that happened during the teaching learning process including teacher, students and the context of situation that were done by the collaborator, interview sheet was used when the writer want to identify the problems occurred in the learning process and questionnaire as the personal records which usually taken by the writer that was written up daily.

A collaborator was asked to observe and evaluate all the situations during the teaching learning process, the researcher, the students and the class in the teaching learning process.

RESULT AND DISCUSSION

The students’ score increased from first evaluation to third evaluation. The writer gave the evaluation in second, fourth, and six meeting. During the research, it was found out that the students’ score kept improving from first evaluation to last evaluation. By application students’ Realia score was significantly improved. The ranges of score improvement can be seen in the following table:

<table>
<thead>
<tr>
<th>Range of Score Improvement</th>
<th>Students’ Initial</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>26-30</td>
<td></td>
<td>8</td>
</tr>
<tr>
<td>Range</td>
<td>Number of Students</td>
<td></td>
</tr>
<tr>
<td>---------</td>
<td>--------------------</td>
<td></td>
</tr>
<tr>
<td>21-25</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>16-20</td>
<td>11</td>
<td></td>
</tr>
<tr>
<td>11-15</td>
<td>8</td>
<td></td>
</tr>
<tr>
<td>6-10</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

Number of Students: 41

a. Students who got the improvement score about 26-30:
   - from 65-94
   - from 60-90
   - from 60-90
   - from 62-89
   - from 60-90
   - from 60-88
   - from 60-90
   - from 60-88

   There were 8 students who got the improvement of score 26 – 30. They were students who did not like English. But, after the teacher paid attention to them more, asked them problem, and applied Realia, they became interested in writing descriptive text.

b. Students who got the improvement score about 21-25
   - from 60-85
   - from 70-93
   - from 63-88
   - from 67-90
   - from 65-90
   - from 65-86
   - from 63-84
   - from 68-89

   There were 9 students who got the improvement of score 21 – 25. They were active students during teaching learning process. Almost of them got points 85 up in the last evaluation. They were active from the first until the last meeting.
in asking questions and they discussed every problem that they faced with their own team and pair so that their scores also kept improving.

c. **Students who got the improvement score about 16-20**
   - from 64-84
   - from 73-90
   - from 70-90
   - from 70-86
   - from 69-89
   - from 68-87
   - from 70-88
   - from 63-83
   - from 63-81
   - from 71-90
   - from 65-84

   There were 11 students who got the improvement of score 16 – 20. Even though the improvement was not so high, it did not mean the students in this range were not competent in writing descriptive text. Two of them achieved satisfying score up to 90 that are MDN and SHS in the last evaluation. Then the low score in this range was just 81, it meant they could pass the test well.

d. **Students who got the improvement score about 11-15**
   - from 75-90
   - from 70-85
   - from 70-85
   - from 65-80
   - from 60-75
   - from 72-85
   - from 69-82
   - from 67-81
There were 8 students who got the improvement of the score 11-15. The score improvement was not too high almost students in this range were smart students. There was one student who got the score just 75 in the last evaluation. It was NHL, but NHL still passed the evaluation. Because they were very smart students, sometimes they did not pay attention to the teacher and in their own team, they were not serious to hear the explanation. But, they kept improve their score until the last writing evaluation because of the realia.

e. **Students who got the improvement score about 6-10**

- **from 80-90**
- **from 73-80**

There were 3 students who got the improvement of score 6-10. The score improvement was low, but in these range just three students who got the improvement from 6 until 10. Then no one got lower than 80. It meant they are good students but they did not pay attention to the lesson that was given by the teacher.

There were difference in the lowest and the highest of students’ writing score in each writing evaluation which was given during the research. The differences showed that there was a significant improvement of students’ writing. The improvement of students’ score in each writing evaluation can be seen in the following table:

<table>
<thead>
<tr>
<th>Type of Score</th>
<th>Evaluation I</th>
<th>Evaluation II</th>
<th>Evaluation III</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>M1</td>
<td>M4</td>
<td>M6</td>
</tr>
<tr>
<td></td>
<td>Cycle I</td>
<td></td>
<td>Cycle II</td>
</tr>
<tr>
<td>Lowest Score</td>
<td>60</td>
<td>70</td>
<td>75</td>
</tr>
<tr>
<td>Highest Score</td>
<td>80</td>
<td>85</td>
<td>90</td>
</tr>
<tr>
<td>N</td>
<td>32</td>
<td>32</td>
<td>32</td>
</tr>
</tbody>
</table>

Note:

- M  = Meeting
- N  = Number of Students
From the table above, it was seen that students’ score kept improving. In writing evaluation I, the lowest score was 60 and the highest score was 80. In writing Evaluation II, the lowest score was 67 and the highest score was 88 whereas in the last writing evaluation, the lowest score was 81 and the highest score was 94. It showed the significant improvement in students’ writing descriptive text.

The improvement of students’ score in writing descriptive text through realia also can be seen from the mean of the students’ score in every writing evaluation. The mean of students’ score can be seen below:

\[
\bar{x}_1 = \frac{2718}{41} \times 100\% = 66.2926
\]
\[
\bar{x}_2 = \frac{3147}{41} \times 100\% = 76.7560
\]
\[
\bar{x}_3 = \frac{3568}{41} \times 100\% = 87.0243
\]

<table>
<thead>
<tr>
<th>Meeting</th>
<th>Total Score</th>
<th>Mean</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evaluation I (Cycle I)</td>
<td>I</td>
<td>2718</td>
</tr>
<tr>
<td>Evaluation II (Cycle I)</td>
<td>II</td>
<td>3147</td>
</tr>
<tr>
<td>Evaluation III (Cycle II)</td>
<td>III</td>
<td>3568</td>
</tr>
</tbody>
</table>

The mean of the students’ score in the first meeting was the lowest of all meetings. In the last meeting, the students’ score improved. From the data analysis, the mean score of the students’ writing increased from 66.2926 to 87.0243. It meant that the ability of students in writing descriptive text was improved.

In this research, the indicator of successful in writing descriptive text was if 75% of students have got score up to 75 in their writing evaluation because the
English passing grade at the school was 75. The number of the students who were competent in writing descriptive text was calculated below:

\[ P_1 = \frac{2}{41} \times 100\% = 4.87\% \]

\[ P_1 = \frac{30}{41} \times 100\% = 73.17\% \]

\[ P_1 = \frac{41}{41} \times 100\% = 100\% \]

Table 4.8 the Percentage of Students’ Writing Descriptive Text

</tbody>
</table>

In writing evaluation I, there were 2 students who got point 75 up. The percentage of students’ achievement in descriptive text kept increasing when TPS method was applied. In the first cycle, 4.87% students got points 75 up whereas in the second cycle 100% students who got points 75 up. The range of the first meeting (4.87%) and the last meeting (100%) was 87.0243%. It had been proved that 87.0243% students got the good score on their writing achievement. It can be concluded that realia worked effectively and efficiently in helping students in improving their achievement in writing descriptive text.

**Qualitative Data**

The qualitative data were taken from observation sheet, questionnaire sheet and interview that gained within two cycles.

**Observation Sheet**

From the result of observation sheet, it can be concluded that teaching learning process by applying realia run well. The situation of teaching learning
process was comfort, lively, and enjoyable. Because from the data that was taken from the first (I) meeting to the last (VI) meeting we can find out that the Note in the data got good and very good. It means the score in this data was just gotten from 3 to 4.

So this TPS method created a good environment in teaching learning writing in which students became active in the process of writing, focus their mind to the teachers’ explanation, and share in their team and pair and then finish in individually. In individually work, the students could improve their confidence to finish the work because they had discussed in team and pair.

**Interview**

From the interview data those were taken by the teacher and the students from the first meeting and the last meeting, we could find out that the teacher was very interesting to the students because the students were very active and enjoyed with English but students ability in writing descriptive text was not good enough and then the teacher did not have effort to improve it.

From the interview with the students in the first meeting, it can be found out that the students very interesting with English and most of the students like to write descriptive text, because from 6 students that the writer interviewed said like. So from this data we can conclude that most of the students like to write the descriptive text. That was why it was needed to improve their achievement in writing descriptive text by the application of realia.

From the second interview that was taken from teacher, it can be find out that the application of realia in teaching learning process especially in writing descriptive text was very helpful to improve the ability of students in writing descriptive text. And according to the teacher this method was very good because can make the students became active and enjoy the lesson.

Furthermore, from the last interview that was taken from the students it can be find out that most of the students like this method and the said that this method was very good to improve their achievement in writing descriptive text because they could be active and enjoy the material. And from the 6 students, all
of them said realia was very good and just one student said that it was very busy but the student also like.

So, from the entire interview, it can be concluded that realia was very good to improve the students’ achievement in writing descriptive text at SMP N 2 Kisaran grade VII-4 and the teacher will apply realia in teaching learning process not only writing but also another subject.

**Questionnaire**

From the result of questionnaire, it can be found out that realia can improve the achievement of students because from the data no one of the students fill in disagree and strongly disagree then no more than 4 students fill in the neutral. So most of the students fill in agree and strongly agree. It meant that this realia as very good for the students.

In significantly, from the data that was taken from questionnaire 2 percentage of strongly agree was 145 with mean 44, 2073%, agree 157 with mean 47, 8658 %, neutral 26 with mean 7, 69268 % and disagree and strongly disagree 0 %. So, from this questionnaire data we can concluded that the students was very interesting and enjoy the realia in teaching learning process especially in writing descriptive text.

Besides that, from the data that was taken from the questionnaire sheet 2 it can be found in the first statement that the percentage of students who chosen a was 58, 5365 %, b was 14, 6341 %, c was 19, 51% and d was 9, 7560 %. It meant that most of students had learned to work to gather from this realia. So they were active in teaching learning process. And then from the statement 3 the students who chosen a is 53, 6585%, b is 24,3902 %, c is 12, 7560 % and d is 97560, %.

It meant that most of students had learned about pair accountability and pair responsibility. In additional, from the statement 3 the students who chosen a is 78,048, b was 7,3170 %, c is 7, 7560% and d is 4, 8780 %. It meant that most of students in this research had learned to produce something alone.

From the all questionnaire data, it can be concluded that the students were very interesting and enjoying the realia and they the students were not only
improve their achievement in writing descriptive text but also improve their teamwork, responsibility and self confidence.
CONCLUSION AND SUGGESTION

Conclusion

Having analyzed the data that have been presented in the previous chapter, it was found that average scores of students in every evaluation kept improving. It can be said that there was a significant improvement on the students’ achievement in writing descriptive text by applying the application of Realia. It can be seen from the improvement of mean of students’ score, namely: the mean of first evaluation (66, 2926) increased to the mean of second evaluation (76, 7560) and the mean of third evaluation (87, 0243). The score continuously improved from the first evaluation to the third evaluation. Observation result showed that the students gave their good attitudes and responses during teaching and learning process by applying the application of Realia. Questionnaire and interview report showed that students agree that the application of Realia had helped them in writing descriptive text. it can be concluded that the application of Realia significantly improved students’ achievement in writing descriptive text.

Suggestion

The result of this study showed that the application of Realia could improve students’ achievement in writing descriptive text. In relation to the conclusion above, some points are suggested, as follow:

1. The English teacher are suggested to use Realia as teaching method to stimulate the students’ learning writing spirit in teaching writing process.
2. For the readers who are interested for further study (university students) related to this research should explore the knowledge to enlarge the understanding about how to improve students’ achievement in writing and search another reference.
