Kata Kunci : Pendidikan, Filsafat, Pancasila

INTRODUCTION

The importance of studying Pancasila education for students and college students in higher education is so that students can know and understand the rights and obligations as Indonesian citizens. Together with religious and citizenship education, Pancasila education plays an important role in the formation of morals, manners, behaviors and personalities that are healthy and soulless with Nationalism.

And the reality that happened to students of the Informatics Class of the Medan Institute of Technology was based on the results of our research, that almost all of their students had been able to implement or apply the Pancasila values to their daily lives.

The limitations of the research that we examine are about the

application of Pancasila values to the daily lives of students. That is the first Precept, the Godhead the One. The second principle, just and civilized humanity. Third principle, Indonesian Unity. The fourth principle, popularism is led by wisdom of wisdom in representative deliberations. The fifth principle, social justice for all Indonesian people.

METHOD

The location used is the Informatics Class of the Medan Institute of Technology. The research period was Thursday on November 16, 2017. This research included qualitative research. The subject used is the Informatics Class of the Medan Institute of Technology. The reason for choosing this class as the subject of research is because this class already has an Educational Philosophy

course and is willing to be made the subject of research. The tool used for this research is in the form of questionnaires and data collection techniques in the form of observations.

Based on the data analyzed from the results of a questionnaire discussion about the implementation of Pancasila value in the Informatics Class of the Medan Institute of Technology.

The Implementation of the Value of Pancasila (the One Godhead) based on the results of the study using a questionnaire on the Class Informatics of the Medan Institute of Technology the highest response is respecting friends who are worshiping and not disturbing. Nearly 100% of students answer always means that the practice of the value of the precepts is very high in that class. Tolerance in worship is very high. The Supreme Sense of God has been realized in the aspects of life of the Informatics Class students of the Medan Institute of Technology.

The Implementation of Just and Civilized Pancasila Values of Humanity based on the results of the study using a questionnaire on the Informatics Class of the Medan Institute of Technology the highest response is that friends do not choose ethnic / ethnic backgrounds. Nearly 100% of students answer always means that the practice of the values of the Fair and Civilized Humanity is very high in that class. Tolerance and respect for each other's differences in the 2017 B Regular Education class are very good. This means that in their daily lives ethnic differences do not become a barrier in their interactions, this proves the existence of a sense of humanity towards others.

Implementation of the Pancasila Value of Indonesian Unity based on the results of the study using a questionnaire

on the Informatics Class of the Medan Institute of Technology, the students' response is good, only this unity value is still partly unrealized. For example, the use of language everyday. There are still some students who do not use Indonesian as their daily language. But when speaking to teachers always use Indonesian. This means that the value of unity itself has been realized. It's just because the location of students belonging to the Batak tribe is homogeneous so students still often use the language of the surrounding area.

The Implementation of the Value of the Pancasila of the People Lead by Wisdom of Wisdom and Consultation based on the results of the study using a questionnaire on Class Informatics in the Medan Institute of Technology positive student response. Nearly 100% of students answer always when making statements about deliberation. In making a decision students from the Informatics Class Medan Institute of Technology always hold a meeting. This means that in the aspects of student life in society, they have implemented the fourth principle of Pancasila values.

Implementation of the Pancasila Value of Social Justice for All Indonesian People based on the results of research using a questionnaire on the Class Informatics of the Medan Institute of Technology negative response. A sense of justice towards others is still relatively low in that class. Some students answered that sometimes the

statement of like to behave unfairly towards friends means that the practice of the values of social justice for the entire Indonesian people is still not fully implemented.

CONCLUSION

Based on research conducted by Pancasila indigo practice among students of the Informatics Class of the Medan Institute of Technology, almost all of them have been realized in life. It's just that some things are not realized, for example, the use of Indonesian is still a lot that does not make it a daily language, because the community is classified as homogeneous.
